

Rising 5th Grade 2024

Summer Reading and Math

Here are suggestions to help your rising fifth grader practice important skills as they enjoy their summer break.

Students should read at least 30 minutes each day to improve and reinforce skills. Attached are book lists and activities to keep your student reading. The Alachua County Library District has books as well as weekly events for readers of all ages. Audiobooks are great for traveling. If the student also reads the book while listening, comprehension is enhanced. Journaling about daily activities, drafting stories or poems, and writing about reading will also help your student develop writing fluency and stamina.

The math choice board has six weeks of math practice. We suggest choosing three activities to complete each week. Methodology's *Splash of Math* workbook is a great resource to use to review all the skills taught this year. This workbook has a variety of leveled problems and activities as well as QR codes with links to videos to reteach skills. As always, students can use iXL or 99math as online resources to help keep math skills and math facts fresh!
